

The OBD-3035 is a pure Plug & Play device. Locate your vehicles OBD Diagnostics port, on most passenger vehicles this is located below the knee panel on the driver side of your interior. Once found, plug the device into the OBD Diagnostics port. Ensure the fit is right and verify that the device now has turned on by looking at the indicator lights on the side. If the device is connected but seems loose, please secure a zip tie around the device and OBD port.
